Mason County PUD 3 offers its customers a voluntary program to purchase green power. Green power is available in 100 kilowatt-hour blocks or customers may choose to participate at the 100 percent level. Both options are in addition to the base rate. See the Mason Evergreen Power Program hand out or PUD 3's website at www.masonpud3.org for current rates (subject to change) and more detailed information. You can change your participation level or discontinue your participation in the program at any time by calling one of PUD 3's customer service representatives.

Name: _____ Phone No.: _____

Service Address: _____ Account #: _____

Check one:

_____ Purchase a monthly block of Green Power: _____ blocks.

_____ Purchase Green Power at the 100-percent level.

Signature: _____ Date: _____

The charges for Mason Evergreen Power will begin with the next billing period, are not prorated, and are in excess of energy consumption. The PUD reserves the right to remove customers that have a poor credit history from the program. Participation in the program does not represent an exclusive supply of renewable energy. However, all electricity generated for the Mason Evergreen Power Program will be fed into the overall power supply grid for the Northwest, which means the electricity received is a "blended" supply of firm and renewable resources.
